

New Year's training start "Temp-O DniproTest # 3"

#Online 02-09 January 2021

Bulletin 1

Description of the competition

These competitions are training, continuation of the «Trail-Online» theme and preparation for the new season of 2021.

We kindly ask participants to provide reliable data in the Google Form (last name, first name, team / personally, country) - the ability to draw up protocols directly depends on this.

Competition time - 10:00 02.01.2021 - 20:00 09.01.2021 (GMT + 2 Dnepropetrovsk, Ukraine).

Location - Pribrezhny Square (Dnepropetrovsk, online).

Distance chief- Dmitry Kurochkin (Dnepropetrovsk, Ukraine).

The type of competition "Internet-TrailO-Start", of the existing types of trail competitions, is more reminiscent of a classic distance.

What is the meaning of the competition in the "Internet TrailO"? On the main photo of each station, you see the situation from the "point of determination" - all flags are signed with letters of the Latin alphabet and the direction to the North is given ("N" - Nord). For each task, it is necessary to determine which of the flags stands on the ground at the point corresponding to the center of the circle (drawn on the map) and at the same time satisfies the legend described in the table. The maps are made in orienteering marks, and the checkpoint legends also meet the orienteering checkpoint legend standard. If none of the flags matches, then the answer for this problem is Z ("Zero").

At this start, there are 3 stations:

1 station - 6 flags (AF) - five tasks.

Station 2 - 6 flags (AF) - five tasks.

Station 3 - 6 Flags (AF) - five quests.

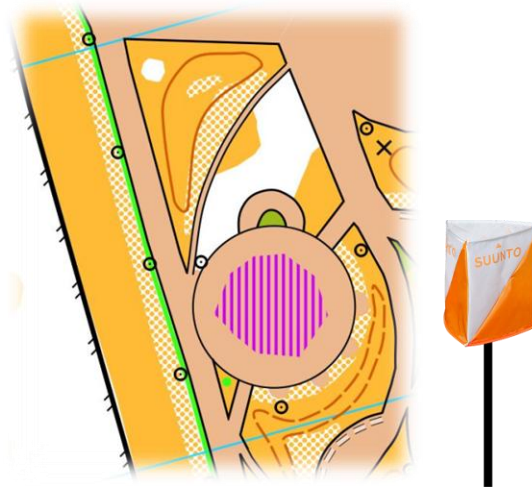

15 quests in total.

Answer Z ("Zero") is possible.

Map info

Terrain type: Park. Scale 1: 2500. ISOM 2017 Symbols (4000 Sprint).

Relief section 2.0 m.

Ranking: 1) The first indicator is the number of answers that coincided with the judges' (who has more - he is higher in the protocol); if the first indicator is the same, then ... 2) The second ranking indicator is who sent (fixed) the answer earlier.

"Zero-tolerance": 1) The maximum permissible deviation for areal and linear landmarks (if this is not another legend or another object) from the real point is a distance of 3 meters (that is, for the answer "Zero" with the same legend, you need a deviation of 3 meters or more). If the legend is different, then the magnitude of the deviation is no longer important. 2) On an off-scale reference point, the permissible deviation in the cardinal points from the required 135 degrees. To answer "Zero" you need a deviation of more than 135 degrees.

Start: The start is carried out using Google Form with 10:00 01/02/2021 - 20:00 01/09/2021 (GMT + 2 Dnipropetrovsk, Ukraine).

The results and solutions will be sent by mail to each participant on January 10, 2021, as well as posted on the website <http://orienteering.dp.ua/> after the end of the competition.

All discussions regarding the correctness and correctness of tasks and their solutions can be conducted in a special form for feedback after the last answer. Also, a link to the feedback form is available separately on the website.
